Higher Efficiency Requirements for Package Terminal Air Conditioners and Heat Pumps

July 29, 2010

The following was issued by Natural Resources Canada and circulated by the Canadian Society of Customs Brokers.

The Office of Energy Efficiency (OEE) of Natural Resources Canada (NRCan) is proposing to amend Canada's Energy Efficiency Regulations under which dealers in Canada would be required to comply with higher efficiency requirements for package terminal air conditioners and heat pumps (PTAC/HP).

More information is available on NRCan's bulletin, available at:
